Do you support allowing the government to conduct real-time surveillance on citizens (such as facial recognition and license plate readers) as an ongoing search for criminals, even when not looking for a specific suspect? Background: •Facial recognition technology scans people’s faces in public places and compares them to government databases to identify individuals. •License plate readers automatically scan and track vehicle plates, logging their locations and movements. Do you support or oppose allowing this type of surveillance?

Gig workers and freelancers—including ride-share drivers, delivery workers, and independent contractors—do not receive traditional job benefits because they are not classified as employees. Portable benefits are designed to move with workers from job to job, allowing independent workers to access healthcare, retirement plans, or paid leave without being tied to a single employer. Do you think gig workers should have access to these benefits?
